Children's Animation

2020™

TM & © Neptuno Films - Megarris. All rights reserved

In this unique and funny series aimed at young adults, we find out what society is like in the near future, in the year 2020! Set in a chaotic city totally dominated by technology, we follow the adventures of Stan, a junior hacker, and his friends Roman and Lesley. Stan lives with his parents Linda and Joe, his twin sisters, and his grandfather in a futuristic household that is full of humor.

We find amazing scientific advances everywhere, like in the streets where everyone has access to automatic psychiatrists, food pill dispensers (now that natural food is illegal!) and instant cosmetic surgery clinics. Animal cloning laboratories abound and even Stan's pet, a dog rabbit hybrid, came from one of them! A wacky look at the future through the eyes of a typical family.

International rights are available in English speaking territories for this series produced by Neptuno Films.
